

Permobil Mattresses, Therapeutic Surfaces & Beds Guide

Retail Price List

About our offering

Permobil has mattresses, therapeutic surfaces, and beds to meet an even wider variety of client needs - including different widths, lengths, and features!

Our newest offering is a line of powered active air surfaces for complex needs. Clients benefit from the Alternating Pressure and Pulsation Therapy systems with Low Air Loss, but with an added transfer edge for improving safety and reducing entrapment risk. We also have a new surface called the Atlas Hybrid that can be used with/without an electrical pump. Last but not least, we've expanded our Permobil Modular Systems with a 42" wide Adapt 2 and now a paediatric size for a crib. These customizable mattresses provide the optimal experience for each client.

Any of these mattresses or surfaces can be placed on our popular Tröst bed for long-term care clients or Hälsa bed for home care. We even have new personal beds for home with the Resten Hi-Lo and Select models. You can trust in our bed solutions to provide safety and comfort! For more information, please contact your local sales representative or our Customer Experience team.

ROHO® mattress section

We have expanded our line of ROHO compatible mattresses to give you even more options. These clinically proven, non-powered, and adjustable pressure relieving mattress sections can be inserted into our: Adapt and Adapt 2 Series, Acute, and leveling pads. These mattress sections are flame and fluid resistant and can be used in a number of configurations - whatever best suits your clients' needs!

To Place Your Order

To place your order, please contact our Customer Experience team at sales.ca@permobil.com or 800-265-9830.

Key terms & highlights

Key terms

Firm borders & bolsters

Firm perimeter borders on our many mattresses and surfaces ensure a solid transfer edge for improving safety and reducing entrapment risk. Domus Edge (shown above) and Serene Edge air surfaces provide extra support for clients. New add-on bolsters with 6" wide transfer edges expands the 36" wide Domus 4 or Auto to 48" wide, and the Serene Air up to 60" wide.

High resiliency and Hybrid foam

High resiliency foam is a versatile foam used in many 5 Minds Mobility mattresses. It is considered to be a highly tensile surface, and can be cut to any size.

Our new Hybrid foam inserts for the Adapt 2 are even more supportive with 1.5" of high resiliency foam topped with 1.5" of Serene™ foam. Serene is similar to memory foam, but is even better for temperature regulation and breathability.

Recovery 5 covers

All modular foam bases and inserts, as well as the 5 Minds Mobility foam mattresses come standard with a Recovery 5 anti-microbial cover which provides incontinent protection and aids in keeping skin cool and dry.

It is removable, machine-washable, fluid-proof and fire-retardant. This material helps wick away moisture and increases air flow and breathability. The vinyl bottom under the mattress includes handles.

UPGRADE to the R5 Ultra! The new Recovery 5 Ultra is an additional zippered enclosure cover for the full mattress surface (and inserts) with 4-way stretch, is machine washable, and provides up to 6X more incontinent protection.

Note: For all modular surfaces, zippered top covers are required and sold separately.

ZIPPERED ENCLOSURE: Adapt 2 mattresses have zippered enclosure cover options in either Recovery 5 or R5 Ultra material. This removable top cover with its 360° zipper must be ordered separately.

For the Acute mattress, you can add a coverlet which has stretchy corners and fits over the entire mattress and inserts (shown above).

Shear Reduction Technology (SRT)

5 Minds Mobility's patented SRT is an innovative solution designed to address shearing forces present during client movement in bed, or when raising the head or foot section of the bed.

Low friction material separates two layers of foam - effectively moving the shearing to the core of the mattress and away from the client.

Gel swirl foam

Gel swirl foam provides enhanced comfort while reducing motion transfer across the mattress surface for an undisturbed sleep. The open cell structure promotes airflow allowing for excellent cooling. Gel swirl foam particles also:

- promote a cool, comfortable sleep
- ensure better heat conductivity than traditional visco elastic foam
- are non-toxic and hypo-allergenic

Mattresses

Adapt mattress

The Adapt modifiable foam surface with SRT addresses shearing forces present during client movement in bed or when raising the head or foot section of the bed, at the same time ensuring proper pressure redistribution. This mattress comes complete with three removable Gel swirl foam inserts, but allows for the addition of up to two ROHO® air mattress sections (sold separately). It comes with firm borders, a raised sleep surface, and full enclosure cover with a Recovery 5 top. Upgrade the mattress with a raised bolster or R5 Ultra cover (see below). **Note:** Custom sizes available, please call for details.

Part Number	Description	Retail Price
AD3680	ADAPT w/ SRT, 36" x 80" x 7" w/ R5 TOP COVER; 350 LB WT CAP.	\$1,497.00

Allay mattress

The Allay Gel swirl foam replacement surface with SRT is our premium option for the client wanting optimal pressure redistribution and comfort. The cooling benefit of the gel-infused Visco foam top combined with a supportive core make this the best option for users not requiring ROHO air mattress sections. It is reversible, has firm borders, a raised sleep surface, and full enclosure cover with a Recovery 5 top. Upgrade the mattress with a raised bolster or R5 Ultra cover (see below). **Note:** Custom sizes available, please call for details.

Foam mattresses

Align mattress & Align Bariatric

The Align surface with SRT comes with firm borders, a raised sleep surface, and full enclosure cover with a Recovery 5 top. It is a unique multi-zone surface that provides differing immersion and envelopment levels that match the contours of the body. There is one piece of HR foam at the torso, with 4" square cuts in the foam under the sacrum, and 2" square cuts under the heels to release the surface tension (see pics below). The foam density and weight capacity are the differences for our Align & Align Bariatric options. Upgrade the mattress with a raised bolster or R5 Ultra cover (see below). **Note:** Custom sizes available, please call for details.

Part Number	Description	Retail Price

Permobil Signature mattresses

Permobil's newest Signature mattresses - the Sömn and Koppla - are customizable foam mattresses are specifically engineered to provide improved performance using pressure-reducing materials. We also offer the updated Optima 2 and Symmetry.

Sömn and Koppla premium mattresses are ideal for long-term care with their 3" wide transfer edges on both sides that help reduce the risk of falls. Each is comprised of a layered foam surface:

Sömn is firmer with a 4" base layer and 2" top layer with Serene™ foam at the heel, while **Koppla** has a 2" thick foam base, plus a 2" middle and a 2" top layer of foam with decreasing density.

Sömn and Koppla both come with fluid-resistant Startex full enclosure covers.

Domus Edge

Low Air Loss Alternating Pressure Therapy system with transfer edge

Domus pump: Client weight references are incorporated into the control panel so caregivers can easily find the correct level of comfort and firmness needed for optimum comfort and healing.

New bolsters transform Domus 4 or Auto into a 48" wide edge surface!

At a glance

- Suitable for clients with medium to high risk for pressure injuries
- Low Air Loss for microclimate control
- 3" wide transfer edges
- Lower 3" of air cells for the whole surface remain static to prevent bottoming out
- Fluid-resistant, four-way stretch, quilted cover
- Zippered cover allows for one-step removal
- Maximum client weight of up to 450 lb
- 2 widths: 35.5" / 42" x 79"L x 8"H
- Gap filler extends 36" model to 84"L, see pg. 24

Domus Edge Alternating Pressure Therapy system takes powered therapeutic surfaces to the next level with the added safety feature of a 3" wide transfer edge. This helps enable safe and easy transfers on and off the surface, and also reduces falls and entrapment. Domus Edge has 10-minute operating cycle that allows the bladders to inflate/deflate to offload and transfer body pressure. Functions include Alternating Pressure Therapy and Constant Low Pressure (static), and the system also features max inflate and seat inflation for the Fowler position. The lower 3" of air cells remain static, even during power outages, to prevent clients from bottoming out. **New bolsters** with full enclosure R5 cover and 6" wide firm transfer edges on each side combine with Domus 4 or Auto to make a Domus Edge surface 48" wide*.

Domus 4

Low Air Loss Alternating Pressure Therapy system

At a glance

- Suitable for clients with medium to high risk for pressure injuries
- Low Air Loss for microclimate control
- Cell-on-cell bladder to avoid bottoming out
- Silver+ nylon, fluid-resistant, quilted cover
- Zippered cover allows for one-step removal
- Visual and audible alarm enhances clients' safety & security
- Maximum client weight of up to 450 lb
- 35.5"W x 79"L x 8"H; gap filler extends system to 84"L, see pg. 24

Domus 4 Alternating Pressure Therapy system has a 10-minute operating cycle that allows the bladders to inflate/deflate to offload and transfer body pressure. Functions include Alternating Pressure Therapy and Constant Low Pressure (static), and the system also features max inflate and seat inflation for the Fowler position. To protect your clients, the Domus 4 has a number of added safety features like a cell-on-cell bladder to avoid bottoming out, a highly visible CPR release valve, and an auto-lock on the settings after five (5) minutes.

Part Number	Description	Retail Price
DOM436	DOMUS 4 SYSTEM: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 450 LB WT CAP.	\$1,995.00

Domus Auto

Alternating Pressure Redistribution System

Domus Auto Alternating Pressure Therapy system has all the same features of the Domus 4 system (see above) with the added convenience of an automatic adjustment system that allows for fast and simple setup, along with finetuning to optimize client comfort.

Part Number	Description	Retail Price
DOMAUTO36	DOMUS AUTO SYSTEM: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 450 LB WT CAP.	\$2,495.00

Serene Edge

True Low Air Loss APT & Pulsation system with transfer edge

Serene pump: Client weight references are incorporated into the control panel so caregivers can easily find the correct level of comfort and firmness needed for optimum comfort and healing.

At a glance

- Suitable for vulnerable clients with high to very high risk for pressure injuries
- True Low Air Loss for microclimate control
- High performance blower offers >120 L/min of air loss for effective microclimate control
- 3" wide transfer edges plus 2" foam layer built into the surface base
- Fluid-resistant, four-way stretch, quilted cover
- Zippered cover allows for one-step removal
- Maximum client weight of up to 650 lb
- 2 widths: 36" / 42" x 79"L x 8"H
- Gap filler extends 36" model to 84"L, see pg. 24

Serene Edge is a dual mode system with Alternating Pressure Therapy (APT) or Pulsation options with the added safety feature of a 3" wide transfer edge. This helps enable safe and easy transfers on and off the surface, and also reduces falls and entrapment. APT modes assist in wound healing and prevention and there are four operating cycles (5/10/15/20 min.) based on therapy requirements. The Pulsation mode increases and decreases the surface's air volume every 15 seconds. Serene Edge also has a Constant Low Pressure (static) option, as well as a max inflate and seat inflation for the Fowler position. A 2" foam layer is also built into the base of the surface to prevent clients from bottoming out. **New bolsters** (shown at right) with full enclosure R5 cover and 6" wide firm transfer edges on each side combine with Serene Air systems to make Serene Edge surfaces in 48", 54", and 60" widths*.

Part Number	Description	Retail Price
SERAEDG36	SERENE EDGE 36" SYSTEM: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 400 LB WT CAP.	\$6,995.00
SERAEDG42	SERENE EDGE 42" SYSTEM: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 650 LB WT CAP.	\$7,995.00
SERENE-PUMP	REPLACEMENT PUMP; USED ON ALL SERENE SURFACES	\$3,295.00
BOLSTER48	FOAM BOLSTER WITH 6" FIRM TRANSFER EDGES ON EACH SIDE; FITS 36" SERENE AIR*	\$849.00
BOLSTER54	FOAM BOLSTER WITH 6" FIRM TRANSFER EDGES ON EACH SIDE; FITS 42" SERENE AIR*	\$949.00
BOLSTER60	FOAM BOLSTER WITH 6" FIRM TRANSFER EDGES ON EACH SIDE; FITS 48" SERENE AIR*	\$1,049.00

*Serene Air system sold separately

Serene Air

True Low Air Loss Alternating Pressure Therapy & Pulsation system

At a glance

- Suitable for vulnerable clients with high to very high risk for pressure injuries
- True Low Air Loss for microclimate control
- High performance blower offers >120 L/min of air loss for effective microclimate control
- Silver+ nylon, fluid-resistant, quilted cover
- Zippered cover allows for one-step removal
- Maximum client weight of up to 920 lb (on 48" mattress)
- 3 widths: 36" / 42" / 48" x 79"L x 8"H
- Gap filler extends 36" model to 84"L, see pg. 24

Serene Air is a dual mode system with Alternating Pressure Therapy (APT) or Pulsation options. Serene Air also has a Constant Low Pressure (static) option, as well as a max inflate and seat inflation for the Fowler position. It includes a zippered full-length pocket with a 1" high foam base. Initial inflation takes less than three (3) minutes, and the surface has a quilted top cover with high moisture vapor transmission rate (MVTR). Serene Air has a number of added safety and convenience features: auto-lock on the settings after five (5) minutes, accessible and highly visible CPR release valve at the control pump, plus a handy carrying bag for compact storage and transport.

Part Number	Description	Retail Price
SERA36	SERENE AIR 36" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 400 LB WT CAP.	\$5,995.00
SERA42	SERENE AIR 42" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 650 LB WT CAP.	\$6,995.00
SERA48	SERENE AIR 48" SYSTEM: AIR SURFACE, PUMP, T&B COVERS, CARRYING BAG; 920 LB WT CAP.	\$7,995.00

Pro-Care Optima

Alternating Pressure Therapy

Pro-Care Optima pump: One-touch set up, auto-sensing technology, and an intuitive graphic display. System has four operating cycles (10/15/20/25 min.) to meet clients' needs.

At a glance

- Suitable for clients with high to very high risk for pressure injuries
- Auto-sensing & auto-inflation technology, with intuitive one-touch set up
- Comes standard with built-in battery backup
- Multi-zone air pressure for optimal comfort, including zero-pressure heel protection zone
- Fluid-resistant and four-way stretch cover
- Maximum client weight of up to 550 lb
- 36"W x 79"L x 8"H

Pro-Care Optima Alternating Pressure Therapy system provides stability and comfort with three distinct zones. It fits your clients' contours offering offloading/redirecting pressure with distinct zones: torso, lower legs, and a static head pillow. The surface features a six cell-in-cell bladder for the sacrum area to provide excellent support when clients are sitting up. This prevents bottoming out, and the rectangular cells offer comfortable pressure relief. With a simple control knob located on the side of the five cylinders at the foot section, you can activate the zero pressure heel protection that allows the heels to be offloaded by deflating up to two bladders in the lower leg zone of the surface.

The auto-adjust feature provides optimal pressure based on the client's changing weight distribution. It also auto-inflates and adjusts pressure in the Fowler position when the head section is raised over 30 degrees to prevent bottoming out. Pro-Care Optima has the battery backup built-in which gives peace of mind and added protection. It can provide non-stop therapy for six hours during transport or in case of power failure.

Part Number	Description	Retail Price
PCOPT	PRO-CARE OPTIMA 36": AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 550 LB WT CAP.	\$9,995.00

Pro-Care Turn

Continuous Lateral Rotation Technology (CLRT)

At a glance

- Suitable for clients with high to very high risk for pressure injuries
- 30° of bilateral rotation therapy to enhance pressure relief
- 3-in-1 therapy available with effortless client repositioning
- Fluid-resistant and four-way stretch cover
- Zippered cover allows for one-step removal
- Visual and audible alarm enhances clients' safety & security
- Maximum client weight of up to 395 lb
- 35.5"W x 79"L x 5"H, with 10" H side bolsters

Bilateral turning can significantly reduce pressure on a client's body while increasing capillary circulation. For immobile or unconscious clients, caregivers must turn them up to 10x/day to achieve this. With the Pro-Care Turn surface, it saves caregivers' time, resources, and health while maintaining quality care for their clients. The 30° degrees of turning not only complies with clinical guidelines, but also provides optimal comfort.

There are three therapies available: CLRT, Alternating Pressure (APT), and Continuous Low Pressure modes, and they can be tailored to individual pressure care plans. The Turning dwell time can be selected between 10, 20, 30, and 60 minutes. APT mode that assists in wound healing and prevention is available in four operating cycles (10/15/20/25 min.) based on therapy requirements.

The high side bolsters reduce the risk of bed entrapment and accidental falling out of bed, and they support the client's arms while in turning therapy. The system also features seat inflation for the Fowler position, and single air-cell deflation for the vulnerable heel section allowing them to float with zero pressure. To protect your clients, the Pro-Care Turn has a number of added safety features like a rotation pause function to allow caregivers to stop a turn right away, transport mode that maintains static pressure relief for six hours during transport or a power failure, plus an accessible and highly visible CPR release valve.

Part Number	Description	Retail Price
PCTURN	PRO-CARE TURN: AIR SURFACE, PUMP, TOP & BOTTOM COVERS; 395 LB WT CAP.	\$9,995.00

Atlas Hybrid

Hybrid powered air surface with Alternating Pressure Therapy

At a glance

- Suitable for vulnerable clients at risk for pressure injuries
- Interconnected chambers and valves for pressure redistribution
- Converts to a powered air surface with APT
- Sloped foot section helps reduce pressure from heels
- 4" wide firm borders for safe transfers
- Fluid-resistant, four-way stretch cover
- Maximum client weight of up to 500-700 lb depending on size of surface
- Atlas Hybrid is available in three widths: 35" / 39" / 42" and 80"L x 7"H; custom sizes are available

The Atlas Hybrid is a non-powered, self-adjusting mattress that utilizes equalization technology to provide maximum pressure redistribution for the prevention and treatment of pressure injuries. Starting at the head, the convoluted high resiliency foam improves client upper body mobility. Next is a cool climate visco gel swirl foam top layer at the torso and middle section for immersion and heat dissipation, followed by a 5-degree sloped foot section made with Serene™ foam to help transfer excess pressure from the heels. Beneath the top layer, interconnected chambers provide pressure redistribution, and there are 4" wide firm borders to ensure a solid transfer edge.

The Atlas Hybrid is also convertible to a powered air surface that uses Alternating Pressure Therapy (APT) with the addition of the digital pump that is sold separately. When the pump is not being used, a valve closure kit is recommended and can be used to adjust the softness/firmness. A manual air pump can also be used to set the firmness of the chambers. Both the closure kit and manual pump come included with the Atlas Hybrid.

Part Number	Description	Retail Price
ATL3580	ATLAS 35" x 80" HYBRID SYSTEM: FOAM SURFACE, TOP & BOTTOM COVERS; 500 LB WT CAP.	\$1,945.00
ATL3980	ATLAS 39" x 80" HYBRID SYSTEM: FOAM SURFACE, TOP & BOTTOM COVERS; 600 LB WT CAP.	\$2,095.00
ATL4280	ATLAS 42" x 80" HYBRID SYSTEM: FOAM SURFACE, TOP & BOTTOM COVERS; 700 LB WT CAP.	\$2,295.00
ATLPUMP	ATLAS DIGITAL PUMP FOR SIZES 35" - 42"	\$379.00

What's going on underneath?

- The 4" high interconnected chambers offer great pressure redistribution under the 2" high visco gel swirl foam and 1" standard foam top layers
- These chambers measure 30" wide by 52" long and fit within the cutout starting under the head area, continuing under the full torso, and stopping at the foot section
- When attached to the pump, you can see the alternating therapy provided by the foam/air chambers
- A valve closure kit can be used to keep the system closed when not attached to the digital pump
- The entire mattress is encased in a fire barrier sock fabric to meet fire retardant standards, and then a Startex cover to protect the foam from fluids

Hybrid therapeutic surface

Atlas Auto Comfort

At a glance

- Suitable for vulnerable clients at risk for pressure injuries
- 2" high Gel swirl overlay for client comfort
- Interconnected chambers in a closed circuit for self-adjusting pressure redistribution
- Sloped foot section helps reduce pressure from heels
- 4" wide firm borders for safe transfers
- Fluid-resistant, four-way stretch cover
- Maximum client weight of up to 500-700 lb depending on size of surface
- Atlas Auto Comfort is available in three widths: 35" / 39" / 42" and 80"L x 7"H; custom sizes are available

New to Permobil, from the reactive surface family, Atlas Auto Comfort uses equalization technology to provide maximum pressure redistribution to prevent pressure injuries or to support the healing process. Beneath the 2" top layer of gel swirl foam there are interconnected chambers in a closed circuit provide self-adjusting pressure redistribution. Clients also benefit from 4" wide firm borders to ensure a solid transfer edge. Atlas Auto Comfort includes a 5-degree sloped foot section to help transfer excess pressure from the heels.

Note: Adapt 2 and Acute modular systems have their covers listed on their product pages.

Adapt 2 Series modular system

36" x 80"

The Adapt 2 mattress with SRT is an innovative way to reduce the effects of pressure, friction and shear within the body of the mattress. The 3" wide firm perimeter borders and 4" permanent gel foam foot border hold the inserts in place without the need for snaps. The surface inserts can be configured based on the individual client's needs.

The removable top cover with its 360° zipper must be ordered separately.

Weight capacity: 350 lb

Note: Adapt 2 base and inserts include a fire barrier sock fabric to meet full-scale fire retardant standards (not pictured).

These foam bases and inserts come with a Recovery 5 anti-microbial base cover. Top covers are sold separately.

Adapt 2 Paediatric modular system

30" x 57"

New option!

The Adapt 2 Paediatric mattress with optional ROHO® Isolette or Serene foam inserts is ideal for vulnerable children with high to very high risk for pressure injuries. The surface inserts can be configured based on the individual client's needs and can hold up to three (3) ROHO Isolette. This modified mattress fits exactly in a standard crib. The 1.5" wide firm perimeter borders and 4" permanent gel foam foot border hold the inserts in place without the need for snaps. The mattress base is protected by a Recovery 5 anti-microbial incontinent cover, as well as a Recovery 5 protective top cover with zipper. Weight capacity: 200 lb

These foam bases and inserts come with a Recovery 5 anti-microbial base cover.

Possible configurations

Acute modular system

36" x 80"

The Acute mattress is our foam surface for the client at high risk of experiencing skin breakdown and may require the addition of ROHO® air components. There are multiple configuration system options available to best meet their needs.

Overall top coverlet must be ordered separately.

Weight capacity: 350 lb

Size: 36" x 80", can be customized to any size (call for a quote)

Insert options: foam or ROHO

These foam bases and inserts come with a Recovery 5 anti-microbial base cover. Top covers are sold separately.

ROHO mattress overlays

From left to right: Prodigy®, SOFFLEX 2®, and ROHO® Dry Floatation®

At a glance

- Provides skin/soft tissue protection
- Adjustable to client's shape and weight, and to changes in position over time
- Accommodates other positioning devices beneath the overlay
- Can be reused with multiple individuals
- Provides immersion and envelopment
- Sections can be easily cleaned and disinfected
- Two-piece enclosure cover
- Maximum client weight of up to 300 lb for Prodigy, 330 lb for SOFFLEX 2, and no weight limit for ROHO Dry Floatation

These three mattress overlays are non-powered, air-filled, adjustable, zoned, reactive, full support surfaces that are intended to conform to an individual's shape to provide skin/soft tissue and deep tissue injury protection and an environment to facilitate wound healing. Flexible, interconnected air cells can be adjusted to match the individual's body contours and changing needs.

The first two are made of durable polyvinyl and comprise of three sections (27" long) to make an overlay that is 81" long, while the last one is made of neoprene and has four sections (19" long) for a 76" long overlay. As you compare the Prodigy, SOFFLEX 2, and ROHO DRY FLOATATION mattress overlays, you also see an increasing number of air cells.

With 720 air cells, the ROHO DRY FLOATATION neoprene mattress overlay allows for even greater conformity and better pressure distribution. Each cell is specially treated to minimize friction and resulting shear, and bariatric kit add-on sections are available to widen the overlay. Drainage holes in the base of the mattress overlay also allows for moisture to drain away from the body. The performance, efficiency and quality of this overlay system are unequaled in the industry.

Covers: The Prodigy & SOFFLEX 2 both use a two-piece zippered enclosure cover. It allows for the removal of the top portion for ease of cleaning if needed without removing the entire product from the bed mattress.

The ROHO neoprene mattress enclosure cover is also comprised of two pieces, but is also water-resistant, flame-retardant, and made of anti-microbial fabric that can be easily cleaned and/or disinfected. Attached straps allow the cover to be secured to a standard single bed mattress. Carrying handles allow for ease of transport of product.

Leveling pads

By using a combination of leveling pads and ROHO® air mattress sections to make an overlay, a high degree of pressure redistribution can be maintained. The pads are made with a high resiliency and stable foam base, and offer the utmost in comfort and support. Simply mix and match the four sections to best suit your needs! Weight capacity: 250 lb/piece

Below are three additional options using ROHO mattress sections.

Beds

Tröst & Tröst Plus

Adjustable long-term care bed

Setup video

At a glance

- Standard and Plus sizes available
- Trendelenburg, Reverse Trendelenburg, and Comfort chair positioning
- 12-button hand pendant
- Low position: 6.75"; High position: 30"
- Flip down directional castor locks at head end, plus swivel locking castor
- Centre step safety lock at foot end
- Mattress retainers and wall bumpers included
- Standard size: 36" x 80"; Plus size: 39" x 80" or 42" x 80" and length extension to 84"
- Weight capacity of up to 600 lb

The Tröst Bed is an electric, adjustable bed ideal for the long-term care setting and community. It offers a low height of 6.75" and a high height of 30" to meet all your caregiving and client needs. Tröst Bed has a 12-button hand pendant and optional footboard attendant controls, so customized comfort is an easy adjustment. The Trendelenburg (and Reverse Trendelenburg) feature comes standard and allows clients to lay flat on their back on a 15–30 degree incline with their feet elevated above the head. Available in a natural or wine colour head/footboard (*sold separately, except when bought as a package*), that are easy to use with quick release hardware.

Optional features:

- Plus model expandable to 39" and 42"
- Length extension from 80" to 84" (added at foot end only)
- Embedded footboard attendant controls
- Half side rails, interchangeable between head and foot sections
- Tall half side rails
- Assist bar (shown), interchangeable between head and foot sections
- Trapeze bar
- Battery backup
- Transport trolley
- **Add an overbed table, see pg. 34**

The **Tröst Bed standard** package includes: 36" head and footboard, and a set of half side rails. The **Tröst Plus Bariatric Bed** package options includes: 36", 39" or 42" head and footboard, and a set of half side rails. Please indicate your choice of natural or wine colour head/footboards.

Hälsa & Hälsa Plus

Adjustable home care bed

Setup video

At a glance

- Standard and Plus sizes available
- Trendelenburg & Reverse Trendelenburg
- Dual posts on each side increases stability at all heights
- Low position: 9.875" (12.125" with large castor)
- High position: 25.625" (27.875" with large castor)
- Disassembles into four section for easy transport or storage
- Standard size: 36" x 80"; Plus size: four width options - 36", 39", 42", and 48"
- Weight capacity of up to 375 lb for standard and 500 lb for Plus/bariatric model

The Hälsa Bed is an electric, adjustable home care bed available in standard and Plus sizes and includes a 10-button hand pendant. The Trendelenburg (and Reverse Trendelenburg) feature comes standard and allows clients to lay flat on their back on a 15–30 degree incline with their feet elevated above the head. Additionally, it offers the capability of moving both the head and foot sections simultaneously, an upgraded large castor option, and easy disassembly for transportation and storage.

Hälsa & Hälsa Plus bed standard features:

- Natural or wine colour head/footboard
- Hooks for incontinence bag
- 3 locking castors & 1 directional locking castor
- Side and foot mattress retainers
- Receptacle for trapeze bar
- 2 receptacles for IV holder stems
- Virtually noise-free with low electrical consumption
- DC Linak motors

Optional features:

- Assist bar (shown) or half side rails, interchangeable between head and foot sections
- Full side rails
- Trapeze bar
- Battery backup
- Upgraded large castor option
- **Add an overbed table, see pg. 34**

The **Hälsa Bed Half Side Rail (HSR)** package includes: 36" head and footboard, and a set of half side rails. The **Hälsa Bed Full Side Rail (FSR)** package includes: 36" head and footboard, and a set of full size rails. The **Hälsa Plus Bariatric Bed HSR** package includes: 36", 39", 42" or 48" head and footboard, and a set of half side rails. Please indicate your choice of natural or wine colour head/footboards. Wine colour option only available in the 36" wide head/footboard.

Resten Hi-Lo

Adjustable elevating home comfort bed

At a glance

- Available in Twin XL and Queen with a height range of 16" - 30"
- Easy to adjust your position using a mobile app or the wireless remote control
- Programmable massage settings
- Built-in USB charging ports, two per side
- Reduce back pressure using the zero-gravity function
- Head & foot articulation to raise your head and feet for a healthy night's sleep
- Four quiet motors to optimize your positioning (head, foot, lumbar, and hi-low)
- Sizes: 39" x 80" and 60" x 80"
- Weight capacity of 410-800 lb

Improve the way you sleep with an adjustable bed frame that can accommodate almost any sleeping position. Resten Hi-Lo elevating adjustable beds are remote-controlled and come with advanced features to help you personalize your sleep experience. Key features include lumbar support, programmable massage, LED underbed lighting, USB charging ports, endless head & foot positioning, mattress retainer to keep it in place as the bed adjusts, and individualized controls. Bed comes with legs and upgraded castors to suit needs.

Resten Hi-Lo bed standard features:

- Motorized lumbar support
- Bed legs (shown right) and upgraded castors
- LED underbed lighting
- Memory settings for specific positions
- Built-in USB charging ports, two per side

Resten Luxury and Hybrid mattress:

- Multi-layer foam mattress, perfect for all types of sleepers
- Available in Twin XL and Queen to match the Resten Hi-Lo bed
- Luxury is 11" high, Hybrid is 12" high
- Hybrid has choice of plush or firm
- Removable zippered cover
- Compressed and rolled for ease of delivery
- Weight capacity is 350 lb for Twin XL and 600 lb for Queen

Optional feature:

- Fixed side rails
- Add an overbed table, see pg. 34

The **Resten Hi-Lo** bed is available in Twin XL and Queen sizes and includes castor upgrade. Side rails are sold separately. For couples wanting to adjust their own settings, put two Twin XL beds together with the free connector to make a King-sized bed!

Resten Select

Adjustable home comfort bed

New Double option!
Queen size shown

At a glance

- Available in Twin XL, Double, and Queen
- Adjust your position using the wireless remote control with built-in storage pocket
- Programmable massage settings
- Built-in USB charging ports, two per side
- Zero-gravity and anti-snore functions
- Head & foot articulation to raise your head and feet for a healthy night's sleep
- Sizes: 39" x 80", 54" x 75", and 60" x 80"
- Weight capacity of up to 600 lb

Adjustable bedframe that can accommodate almost any position to help with better sleep and decrease back pain. Key features include programmable massage, LED underbed lighting, USB charging ports, endless head & foot positioning, mattress retainer to keep it in place as the bed adjusts, and wireless controller. The fixed height legs are 12" high, but adjustable 12" legs can be added.

Resten Select bed standard features:

- LED underbed lighting
- Memory settings for specific positions
- Built-in USB charging ports, two per side

Optional feature:

- Adjustable height legs
- **Add an overbed table, see pg. 34**

Resten Luxury and Hybrid mattress:

- Multi-layer foam mattress, perfect for all types of sleepers
- Available in Twin XL, Double, and Queen to match the Resten Select bed
- Luxury is 11" high, Hybrid is 12" high
- Hybrid has choice of plush or firm
- Removable zippered cover
- Compressed and rolled for ease of delivery
- Weight capacity is 350 lb for Twin XL, 500 lb for Double, and 600 lb for Queen

Resten Select bed comes in your choice of Twin XL, Double, or Queen. For couples wanting to adjust their own settings, put two Twin XL together to make a split King-sized bed! Connector comes standard for the two Twin XL

Overbed tables

Two new options for overbed tables! Each includes a rubberized border to reduce spillage, a powder-coated metal stand with adjustable height, and two locking castors.

Tilting table (far right) has a high-density laminate top that measures 16" x 24" and the pivot stops at 15°/30°/45°/90°. It comes fully assembled and the base is foldable for storage under the bed. Table has a max height of 37" and a minimum height of 25".

Composite table has an injection-molded top that measures 16" x 30" and includes a built-in cupholder. Automatic one-touch height adjustments to a max height of 42" and a minimum height of 30". Comes flat packed with tools and hardware for assembly.

Part Number	Description	Retail Price
UNITYTILTOV	TILTING OVERBED TABLE WITH HIGH-DENSITY LAMINATE TOP	\$230.00
UNITYCOMPOV	COMPOSITE OVERBED TABLE WITH CUPHOLDER	\$230.00

Halo Wing

The Halo Wing helps eliminate the four most dangerous entrapment zones creating a safe bed system environment. It can be used as a side rail replacement, for transferring or movement in bed, and preventing bed rollouts and falls. It exceeds the compressibility of mattress and 2 1/3" gap space along with the 60" exit point for Zones 2, 3, and 4.

Can be used on NOA and Tröst beds, and comes with a lifetime warranty.

Part Number	Description	Retail Price
77701	HALO SAFETY WING, SINGLE MOUNT	\$804.00
77702	HALO SAFETY WING, DOUBLE MOUNT	\$1,000.00
